GLOBAL SOLUTIONS FOR TOMORROW'S SEAFOOD TRADER
WWW.BLUEPRINT-GLOBAL.COM.AU

Experience the strength of Blueprint Global's Integrated Seafood Logistics (ISL), around the world. ISL pairs the global capabilities you need with our proven track record of unbeatable service and execution.

You can rely on ISL to help you manage all the moving parts of your global supply chain - air and ocean freight services, customs brokerage, intermodal, warehousing, distribution, documentation and regulatory requirements.

ISL offers global freight services wherever you need to do business. With offices operating in strategic geographic locations around the world, our dedicated employees apply local market knowledge and regional expertise to every shipment and move your freight from door to door or port to port with precision.

ISL LEARN MORE ABOUT OUR GLOBAL FREIGHT SERVICES AND CAPABILITIES

The global supply chain is a complex set of dynamics that are ever changing and evolving. Our customers are regularly presented with challenges; regulations and a confusing array of rules; capacity constraints and economic pressures; shortages and surpluses. At the centre of it all, most businesses strive to achieve the delicate balance that exists between cost and service.

ISL OPTIMISE YOUR SUPPLY CHAIN FOR RESULTS

ISL offers customers expertise in optimising supply chains and significant improvements to performance. From time to time clientele are aware of their supply chain vulnerability, however, understanding the five steps of disaster logistics and the complexities is a daunting prospect. Customers are invited to leverage ISL's supply chain consulting services ISL will analyse, deconstruct, re-engineer and provide a recommendation towards a strategic solution.

ISL experts become integral members of your supply chain team working collaboratively with your organisation. Our goal is to identify the value add elements within the logistics process ensuring an efficient and effective performance, ultimately improving bottom line results and exceeding your expectations.

ISL will solve particularly difficult or time-consuming problems and facilitate any combination of inbound and outbound freight movement and provide real time milestone reporting.
